## PROJECTS

**[k72 – React + GSAP ↗](#)**  
Oct 2025  
Live Demo: <https://k72.henilp.dev>  
GitHub: [github.com/Henil29/k72](https://github.com/Henil29/k72)  
K72 is an interactive and visually engaging web project built with React and GSAP to demonstrate smooth animations and modern UI transitions. It focuses on creating a seamless user experience through motion design and performance optimization. The app features scroll-triggered animations, timeline-based effects, and responsive layouts for all screen sizes. Built with Vite for fast builds and hosted online, this project highlights advanced frontend development skills and creative animation techniques.  
Tech Stack: React, JavaScript (ES6+), GSAP, CSS3, Vite

**[Connectify – MERN Stack Social + Chat App ↗](#)**  
May 2025 - Jun 2025  
GitHub: <https://github.com/Henil29/Connectify>  
Features: Built a complete social media app using MERN stack (MongoDB, Express.js, React.js, Node.js) Implemented real-time chat using Socket.IO Added user authentication, profile system, follow/unfollow logic Created post management: create, delete, like, comment Designed clean and responsive UI with React

**[ShopSphere – MERN Stack E-Commerce Web App ↗](#)**  
Jul 2025 - Present  
GitHub: <https://github.com/Henil29/ShopSphere>  
Key Features: Developed a full-stack Amazon-style e-commerce platform using the MERN stack Integrated user authentication, cart management, and order processing Built product listing, search, and filtering functionalities Ensured modular backend with Express APIs and MongoDB schema

## SKILLS

- JavaScript
  - React
  - Java
  - Bootstrap
  - Frontend development
  - GSAP (GreenSock Animation Platform)
- HTML
  - Node.js
  - Python
  - Tailwind CSS
  - Web development
  - Framer
- CSS
  - MongoDB
  - MySQL
  - Backend development
  - Django
